

CSS Scopes

meta.scope.item.css could also be *meta.scope.item.hack.star-hack.css*

scopes in **bold** would be the same for all items

meta.property examples:

`meta.property.type.font-style.css`

`meta.property.style.background-color.css`

`meta.property.vendor.effect.webkit-transition-property.css`

`meta.property.vendor.type.webkit-text-fill-color.css`

`meta.property.vendor.box-model.webkit-box-orient.css`

meta.property-list includes the trailing `:` character

meta.property-value includes the terminating `;` character

CSS inside `style=""` could be *meta.property-list.attribute.html.css*
